

Share Insight in Healthcare, Healthcare IT and Medical Technology News

Facing the demographic change, chronically diseases, the obesity epidemic and chronically pain in the industrialized countries on the one hand and the horror of hunger in third world countries on the other, you and me know, that the entire healthcare industry is on its way to the most important industry worldwide.

To assist you on this way to a worldwide healthy community, .BCNI provides 15 years of consulting in Europe with 1,700 projects, 10 years of healthcare experience, 20+ years in the IT and high-tech industry, and an enthusiastic, on-going learning team with a passion for latest technologies. Engineers, healthcare experts, CE and reimbursement professionals, marketing, communications and social media experts are ready for action when it comes to your market entry or market expansion in Europe.

We believe it is particularly important to work together with you to develop innovative strategies, enabling you to market your products and solutions in the world's largest single market Europe, to manage the Formal Conformity Assessment Procedure and to master reimbursement.

Edmund Hain, Managing Director, .BCNI
