

Share Insight in Information Technology News for Business

In today's globalized world IT is in the heart of all business processes. Whether cross-location collaboration, organization-wide workflows, international project teams, cross-country R&D teams in different time zones around the world, global supply chains or procurement networks, transparent order management and order fulfillment processes, company-wide real-time analysis and intelligence – 21st century's economy is almost inoperable without performing, integrated, secure and web-based IT-systems.

IT has not only changed the world of business processes fundamentally. IT as part of multiple technical products such as aircrafts, robotics, cars, machines, household aids, office machines, sporting devices or medical devices – so called applied IT has been a major innovation driver since years, creating basically new products and technologies.

To assist you on your success track .BCNI provides 20+ years in the IT industry, has marketed nearly all global IT milestones of the last decade and lives cutting-edge information technology.
